SKILLS

Django Framework
Django Rest Framework
Fast API
Flask
Python
React Js
React Native
Android (Java)
Flutter (Basics)
HTML
CSS
Bootstrap
Javascript
JQuery
MySQL
MongoDB
Numpy
Pandas
Matplotlib
Python Tkinter
C
Arduino Programming
Bash script
Git Bash

❖ **Android Ads Panel (Dashboard)**
   This is Dashboard panel is basically developed for android developers .
   Developer can manage android phone ads from this panel also they can
   chose the color of the ads .this panel also capanel to send notification to
   android phone .for marketing or any other puposes with OneSignal
   Configurations .this aps also show the current downloads of apps in
   android Playstore.etc

❖ **Cloud Storage Panel (Dashboard)**
   This is a Dashboard to store android application assets to optimize
   android application and reduce android app size , to get those assets in a
   android apps we developed a android module to get the android assets
   by API.

❖ **VPN Panel (Dashboard)**
   This VPN dashboard is used to store VPN configuration .and send this
   configuration to android devices ,to connect android apps with VPN with
   the different server .eg US server .Canada Server etc .

❖ **Python Console Based Projects .**

❖ **Bank management system**
   This Project is Based of Console (CLI) and with database connectivity
   Built with Oops Concept
   To understand the Banking System and handling Multiple user at the
   same time

❖ **Gas Booking system**
   This Project is Based on Console and replicate the Gas Booking system
   .in This Project User can create account Book a Gas Cylinder ,cancel a
   Cylinder ,raise the complain .
   Admin Section admin can manage the Users Staff and The Cylinder Stocks
