PROFESSIONAL SUMMARY

Database Administrator with 4+ years of experience managing database environments across MS MySQL (3.6 years) , SQL Server , and PostgreSQL. Expertise in high availability solutions including MySQL InnoDB Cluster, Master-Slave Replication , Always On Availability Groups, Failover Cluster Instances, Log Shipping, and PostgreSQL Streaming Replication. Proven track record in performance tuning, disaster recovery, AWS RDS management, and ensuring 99.9% database uptime.

TECHNICAL SKILLS

Database Platforms: MySQL 5.7/8.4, Microsoft SQL Server 2012/2014/2016/2017/2019/2022, PostgreSQL 15/16/18

MySQL: MySQL InnoDB Cluster, Group Replication, Master-Slave Replication, Master-Master Replication, MySQL Router, ProxySQL, Percona XtraBackup, Performance Schema, Query Optimization, my.cnf Tuning, mysqldump

MS SQL Server: Always On Availability Groups, Failover Cluster Instances, Log Shipping, Transactional/Merge/Snapshot Replication, Database Mirroring, SQL Server Agent, SSIS, SSRS, Query Store, Extended Events, Index Optimization, TDE, Always Encrypted, T-SQL

PostgreSQL: Streaming Replication, Logical Replication, pgBackRest, pg_dump, pg_restore, VACUUM, Autovacuum, ANALYZE, REINDEX, EXPLAIN ANALYZE, pg_upgrade

Cloud Technologies: Azure & AWS RDS (SQL Server, MySQL, PostgreSQL), Amazon EC2, Amazon S3, AWS

Lambda, Amazon VPC, AWS CloudWatch, AWS IAM, Multi-AZ Deployments, Automated Snapshots, Point-in-Time Recovery

Operating Systems: Windows Server 2012/2016/2019/2022, Linux (Red Hat, Ubuntu, CentOS)

Tools & Scripting: SQL Server Management Studio, MySQL Workbench, pgAdmin, PowerShell Scripting, Shell Scripting, Bash

PROFESSIONAL EXPERIENCE

Database Administrator

DBA DEV Software Solution Pvt Ltd | 3.6 Years

MySQL Administration (3.6 Years)

- Configured Master-Slave and Master-Master Bidirectional Replication across geographically distributed servers
- Deployed MySQL InnoDB Cluster with Group Replication for automatic failover and high availability
- Performed my.cnf configuration tuning, version upgrades, and performance optimization using EXPLAIN plans
- Managed backup strategies using Percona XtraBackup, mysqldump, and automated scripts
- Resolved replication lag issues using Performance Schema and slow query log analysis

MS SQL Server Administration (4 Years)

- Implemented Always On Availability Groups and Failover Cluster Instances achieving 99.95% uptime for 100+ databases
- Configured Log Shipping and Transactional/Merge/Snapshot Replication for disaster recovery and distributed environments
- Performed performance tuning through index optimization, query analysis, execution plan reviews, and wait statistics analysis
- Managed backup operations (full, differential, transaction log) with automated scheduling and recovery strategies
- Executed database migrations and upgrades from SQL Server 2012/2014 to 2019/2022 with minimal downtime
- Implemented security best practices including TDE, Always Encrypted, and role-based access control
- Troubleshot blocking, deadlocks, and long-running queries to optimize system performance

PostgreSQL Administration

- Set up Streaming Replication and Logical Replication for high availability and load distribution
- Configured pgBackRest for comprehensive backup and point-in-time recovery
- Performed database maintenance including VACUUM, ANALYZE, REINDEX, and connection pooling using PgBouncer
- Conducted query performance tuning using EXPLAIN ANALYZE and managed upgrades with pg_upgrade

AWS & Azure Cloud Database Management

- Deployed AWS RDS instances for SQL Server, MySQL, and PostgreSQL with Multi-AZ configurations
- Configured automated backups, snapshots, and point-in-time recovery on AWS RDS
- Managed Amazon EC2 instances and utilized Amazon S3 for backup storage with lifecycle policies
- Implemented AWS Lambda functions for automated maintenance and configured VPC security groups
- Monitored database performance using AWS CloudWatch metrics and alarms

Daily Operations

- Database creation, configuration, datafile management, storage management, and capacity planning
- User account management, permission grants, security auditing, and performance monitoring

- Incident response within SLA timeframes, technical documentation, and automation using PowerShell/Shell scripts

KEY ACHIEVEMENTS

- Reduced database downtime by 40% through implementation of Always On Availability Groups and InnoDB Cluster
- Improved query performance by 60% through systematic index optimization and query tuning initiatives
- Successfully migrated 50+ databases to AWS RDS with zero data loss and minimal downtime
- Automated 80% of routine DBA tasks using PowerShell and Shell scripting, saving 15+ hours weekly
- Implemented comprehensive backup strategy achieving RPO of 15 minutes and RTO of 30 minutes

CERTIFICATIONS

AWS Cloud Practitioner | AWS Solutions Architect (Completed AWS Training)

EDUCATION

Bachelor of Technology in Computer Science | Kalinga University | 2019
